LogiMAT 2020: **Handy Guide Inside**

THE SOLUTION FOR INTRALOGISTICS

The contecline series of containers is specially designed for use in automated small parts warehouses and shuttle systems.

Thanks to the special base design, the containers have ideal running properties and are particularly quiet when transported on conveyor lines.

NEW
solutions
10.-12.03.2020

All containers are equipped with fixation slots which enable a flexible division of the container.
